INTRODUCTION

We are proud to offer you this second Guide to Québec Electrical and Electronic Product Manufacturers.

This guide was compiled from information provided by the firms directly to the ministère de l'Industrie, du Commerce et de la Technologie.

Putting together a list of Québec manufacturers of electrical and electronic products entailed contacting over 700 firms in the past year.

The information obtained was carefully screened and evaluated. The 543 companies retained were those where manufacturing accounted for at least 30 % of their sales.

We have done our utmost to avoid errors or omissions, but are nevertheless counting on the companies to point out any oversight.

Part I lists the firms in alphabetical order, including their addresses, telephone numbers, official contacts and the products they manufacture. Reference numbers have also been assigned to facilitate the use of Part II, where products are listed alphabetically with the firm reference numbers from Part III, which has just been added, firms are listed by region.
